

Executive Orders Through the Years

President Trump has used Executive Orders at a pace that will far exceed other recent Presidents. To date, he has issued 129 EOs in just 90 days. Why are EOs such a popular tool with the White House regardless of party? It allows the White House, with limitation, to advance policy without having to deal with the complexities of legislation. Of course, an EO doesn't have the impact of legislation, but clearly is a preferred, easier and quicker route to impact policy.
